National Board of Medical Examiners

Primum Ordering Based Assessment Application

I was brought on board NBME, as a contractor, to implement accessibility features for their Step2 assessment exam application called FRED. This test is part of a series administered to Medical students. A passing grade is needed obtain their medical license. My task was to migrate the code into Chromium frame from an IE frame as well as integrate text zoom and contrast. After the successfully launching FRED it was determined that the accompanying ordering based assessment exam application would be migrated as well. The ordering based app, called Primum, presents the examinee with a patient scenario and the proper treatment/s must be administered in order for a passing outcome. I created design documentation in tandem with a Proof of Concept which is linked below.

Cline Davis Mann

Flumist Quad

During a 3 month freelance stint I worked on a responsive website for flumist, a nasal administration of the flu vaccine. The development practice of creating lots of small files which will assemble into one larger file was incorporated. Bootstrap was used as the design/layout framework and SASS was the CSS extension. The site is optimized for mobile, tablet and devices.

Bristol-Myers Squibb

Capabilities Presentation

This project was completed at the end of last year and showcases projects that were completed in-house at Bristol-Myers Squibb. I led the development aspect of the project which included all of the developers in the department (10-12).

HTML5 video for the demo reel HTML5 elements with fallbacks to older browsers when needed
Optimized for tablets, specifically the iPad JSON feed powers the quotes, campaigns and project sections
jQuery for ajax, modals, animations, etc. CSS3 properties used throughout for rounded corners, gradients, text shadows, etc. Imported into PhoneGap and turned into a native iOS app

True Action

Timberland eCommerce Website

Work for this project was completed from 1/10 - 6/10. The URL listed below has changed since that time period but the structure and initial code still remains in place. Download the zip to see the templates that were created in 2010.

- Development of timberland.com e-commerce website
- Implementation of websites in a Java based MVC environment that used Apache Tiles, JSP, XML & XSLT
- Use of IADs/Wireframes and Redlines/Style Guides to create CSS & HTML template pages
- Creation of JavaScript based upon jQuery and DomFather(custom GSI JavaScript framework)

Interests, Things I've done, Stuff I'm into, etc.

- 8th grade ambition was to be a comic book artist
- Lived in Algiers, New Orleans, LA until age 12
- Skateboarded most of my life
- I was in a Nike commercial

- I take photos. A few links to ones I'm proud of are below.
 - ◆ <https://www.flickr.com/photos/66806806@N00/14026465617/>
 - ◆ <https://www.flickr.com/photos/66806806@N00/14210690452/>
 - ◆ <https://www.flickr.com/photos/66806806@N00/12084763556/>
- Worked as a laserist in the mid-late 90's doing laser shows up and down the east coast
- I've made fonts. I sell and give them away.
 - ◆ dafont | <http://www.dafont.com/robert-fauver.d1400>
 - ◆ myfonts | <http://www.myfonts.com/foundry/Typeology/>
- I had a typography magazine called Typeology which attempted to turn into a foundry.
- I make a good sandwich. <http://lasandwicherie.com/sobe/index.html> & <http://www.ohmaisandwich.com/> are an inspiration to me.
- I enjoy coffee. Especially Small World. <http://smallworldcoffee.com/>
- Sometimes I make techno mixes. <http://www.mixcloud.com/fauverism/>
